Product Specific Notes:

- Due to weight limitations on various operating components, sizes which exceed the standard size range may not be available.
- Multiple bay configurations will be supplied in equal splits. For windows 1800mm high and over, it is recommended to consider the operation of the window to ensure the configuration selected is the best 'fit-for-purpose'. Issues such as reach, sash weight and furniture position are some aspects that can affect the ability to open and close a double hung
- window. The option of selecting a Counter Balance operation in such situations should be considered.
- Where a choice of configuration for a particular width is illustrated above, the customer is to nominate the number of bays required.
- Single bay windows over 1000mm in width will be fitted with two (2) catches
- Spring-balance type operation is supplied as standard unless counter balance type is requested.
