LIGHT GREY LAMINATE

The **Smart Choice** in Performance Glass

ENHANCED SAFETY

In the event of human impact, laminated glass will remain intact, significantly reducing the potential for serious injury to your family.

IMPROVED SECURITY

Security screens leave fixed panels exposed to easy break & enter. The interlayer within laminated glass acts as an effective barrier against forced entry ensuring the whole glazed area has a level of security.

REDUCED NOISE

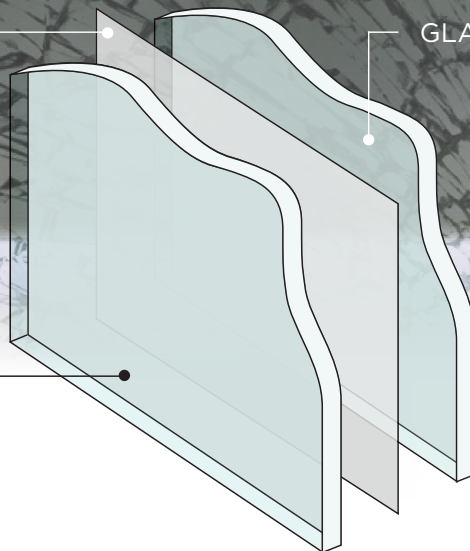

Laminated glass has excellent sound reducing properties making it a cost-effective alternative to double glazing.

REDUCED HEAT GAIN

Light grey laminate efficiently reduces the amount of heat entering your home by around one-third.

REDUCED GLARE

The light grey tone is subtle and aesthetically pleasing, offering the perfect balance between light transmission and glare reduction.

REDUCED FADING

The interlayer which bonds the glass together eliminates 99% of damaging UV rays, prolonging the life and colours of your furnishings, flooring, curtains etc.

Compared with ordinary Clear glass, **Light Grey Laminate eliminates 20% more heat and reduces 31% more glare.** It also **eliminates 99% of UV rays.**
